SUMMARY

Computer science undergraduate (B.Sc., 2026) who builds and ships backend services in Python and Java. Designed, built, and deployed ExpenseSnap, a live personal finance PWA running on a Flask REST API with 20+ endpoints, PostgreSQL, Google OAuth 2.0, and Gemini Vision receipt scanning. Looking for a backend engineering internship or entry-level role.

SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL

Backend: Flask, Django, Spring Boot, SQLAlchemy, REST API design, OAuth 2.0, Web Push (VAPID), Flask-Migrate

Frontend: React 19, TypeScript, Vite, Tailwind CSS v4, Framer Motion

Databases: PostgreSQL, SQLite, MongoDB, schema design

Cloud and tooling: Firebase Hosting, Firebase Cloud Functions, Render, Git, GitHub, CI/CD

AI and data: Google Gemini Vision API, LLM API integration, Pandas, Matplotlib, ReportLab

Concepts: OOP, MVC and MVT, third-party API integration, performance optimization, AI-assisted development workflow

EXPERIENCE

Full Stack Developer Intern, RETECH Solutions, Chennai

Jun 2025

- Built and deployed UserProfile Manager, a Django web app with user registration, session-based authentication, profile photo upload, and editable bio data on SQLite.
- Structured the app on Django's MVT pattern with server-side form validation and tuned SQLite query patterns for faster data handling.
- Owned the feature end to end: API and schema design, frontend integration, debugging, testing, production deployment, and version control in Git.

PROJECTS

ExpenseSnap, live PWA | github.com/imSai-py/ExpenseSnap

React 19, TypeScript, Python Flask, PostgreSQL, SQLAlchemy, Google Gemini Vision, Firebase, Web Push

- Built and shipped a personal finance PWA as a solo project: a modular Flask REST API with 20+ endpoints, a PostgreSQL schema managed with Flask-Migrate, expense CRUD, income tracking, and a real-time analytics dashboard.
- Added receipt scanning with the Google Gemini Vision API, which reads merchant, date, amount, and category off a photo, plus SnapBot, an LLM chat assistant that logs expenses from plain English and answers spending questions.
- Shipped CSV and XLS bulk import with row-level validation, PDF reports through ReportLab, monthly budget alerts, and Web Push notifications over VAPID.
- Split the backend into separate authentication, AI, and notification service modules, wired up Google OAuth 2.0 sign-in, and managed frontend state with React Context across six feature modules.
- Deployed to Firebase Hosting with Cloud Functions and a hosted PostgreSQL database.

EDUCATION

B.Sc. Computer Science, VISTAS (Vels Institute of Science, Technology and Advanced Studies),

2023 - 2026

Chennai

CGPA: 7.63 / 10

Higher Secondary (HSC), Sri Sankara Vidyashramam Matric. Hr. Sec. School, Chennai

2023

CERTIFICATIONS

Java Full Stack Developer, AISECT India. Core Java, OOP, Spring Boot REST APIs, HTML5, CSS3, JavaScript

Mar - May 2026

The Complete Python Bootcamp: Zero to Hero in Python, Udemy. OOP, decorators, collections, file I/O, Tkinter

Jul 2025
